**About me** I am an experienced designer/developer with a passion for usability, accessibility and technology who specialises in the SharePoint platform. 10 years industry experience has not dulled my desire to learn, and am constantly exploring new and exciting facets of the web as it evolves. I thrive on dynamic challenges faced with integrating the latest front-end capabilities like integrating HTML5 and CSS3 on SharePoint.

**Aug 2013 – Dec 2014,** **London Borough of Camden – London, UK (Contract)**  
**London Borough of Camden Collaboration Spaces**

Lead UX Developer on the rebranding/redevelopment project of team collaboration sites built on the SharePoint 2010 platform for over 6000 users.

- Oct 2012 – Mar 2013**
- Constructed a scalable IA solution which allowed business units to organise their team's documents around their processes
  - Prototyped interactive concepts in HTML and JavaScript to illustrate more complex activity flows within a SharePoint context
  - Integrated the Bootstrap v2.3.2 framework into custom SharePoint master pages and page layouts, resulting in many advantages:
    - Native responsive design in browser for mobile devices, eliminating multiple calls to the server
    - Implemented Less CSS to modularise selectors enabling extensive reuse, thus reducing future development time
    - Created internal style guide to streamline front-end development processes
  - Encouraged the adoption of an online kanban tool to create user stories and conducted product backlog grooming session with product owner. This meant greater transparency and accountability amongst all team members for rapid changes.

SharePoint  
2010,  
Requirements  
Gathering,  
Wireframes,  
Activity Flows,  
Visual Design,  
Bootstrap, Less  
CSS, jQuery,  
Agile  
methodology

**Jul 2013** **The Full Suite – Wellington, New Zealand (Contract)**  
**Suite Moves**  
Sole designer of Suite Moves, a tool enabling Full Suite customers to easily migrate locally stored documents to their SharePoint Online environment, through the simplicity of drag and drop.

- Reduced need for manual migration by external developers
- Proof of concepts designed and developed using Photoshop, PowerPoint and Expression Blend.
- Integrated HTML/CSS with data variables using Knockout JS framework.

Office 365,  
SharePoint  
Online, HTML 5,  
jQuery, WPF,  
Photoshop,  
Knockout.js

**May 2012 – Oct 2012** **SapientNitro – London, United Kingdom (Contract)**  
**EE Shop, EE Community**  
Delivered a high-transactional e-commerce site for a top tier telecommunications organization (EE). The design had to react responsively against a wide range of mobile, tablet and desktop device, as well as be cross-browser compatible.

Front-end,  
HTML/CSS,  
Responsive  
design, Media  
queries,  
Mootools

- Constructed responsive multicolumn grid to prototype responsive layouts using advanced media queries and viewport techniques
- Provided cross-compatible alternatives to older browsers using Modernizr
- Integrated clean code with a legacy JSP environment, using MooTools library

**Dec 2011, Jan 2012 – Apr 2012** **View Plc - London, United Kingdom (Contract)**  
**Old Mutual Group - Corporate Intranet**  
Redeveloped master pages and page layouts to minify page weight and increase performance speed built on SharePoint 2010. Dealt with key stakeholders to gather requirements and implement accurate solutions.

- Reduced content database by 30% through custom starter master pages, modular

SharePoint  
Front-end,

### Education

2002 - 2003  
**Natcoll Design Technology**  
Diploma of Web Development

1998- 2001  
**Victoria University of Wellington**  
Bachelor of Commerce and Administration, majors in

- Electronic Commerce & Multimedia
- Management

### Recognition

Award-winning team member of the **Nielsen Norman Group 2008 Intranet Design Awards** for the **New Zealand Ministry of Transport** intranet built on SharePoint 2007  
<http://www.nngroup.com/reports/intranet/2008/awards.html>

First development project on the Kentico platform; recognised for our efforts by being awarded **Kentico Site of the Year 2010**  
[www.kentico.com/customers/Site-of-the-Year/Site-of-the-Year-2010](http://www.kentico.com/customers/Site-of-the-Year/Site-of-the-Year-2010)

"Isha's strength is focus - he works away at a problem until resolved and is not afraid to dive into the deep-end with new technologies or design problems"  
- Zef Fugaz, Experience Designer, Click Suite (previously Design team manager at Provoke)

Tortoise SVN was deployed on all client desktops within the courseware team</li> </ul>

## Professional Development

July 2010

### Wellington Web Meetup

Conducted a presentation on the value of Microsoft's SketchFlow programme as a high fidelity wireframing tool.  
[www.slideshare.net/adollop/using-sketchflow](http://www.slideshare.net/adollop/using-sketchflow)

2009, 2010

### NZ Summer of Code bootcamp

A nationwide drive in getting businesses to connect with New Zealand's brightest university students providing them with internship opportunities. I conducted yearly workshops focused on the basics of HTML/CSS ensuring their code would be of professional standard.

August 2010

### UX Australia Conference – Melbourne, Australia

Feb 2008 / 2010

### Webstock Web Conference – Wellington, NZ
